Program Notes:

I composed *The Goblin March* in 2012 as a collection of works for my senior composition recital at the University of Wisconsin-Superior. Originally conceived as an electric bass quintet, this piece was a partial exploration of interlocking phrasing that causes the melody to flick back and forth across the ensemble. I preserved many of these special effects in subsequent adaptations/revisions (examples: Flutes 1 and 2 measures 13-14 and 27-28).

The majority of this piece is constructed from a repeating melody that 'marches' atop two oscillating chords. As the march progresses, the melody evolves with changing rhythms, registers, and harmonies. The middle atonal section (measures 57-77) makes use of a separate repeating melody with angular shifts that depict the ominous whims of a goblin.

A fun and light-hearted quartet, *The Goblin March* was inspired by the cartoon adaptation of *The Return of the King* (1980). Spirited rhythms with a deliberately plotting bass line evoke images of armor-cladded goblins marching away into the distance.
